Contents of Volume 70

Volume 70, Number 1, May 3, 1976

AUTHOR INDEX, Volume 70, Number 1, May 3, 1976 ii

ROBERT B. SCHEELE AND GARY G. BORISY. Comparison of the Sedimentation Properties of Microtubule Protein Oligomers Prepared by Two Different Procedures 1

JEANIN SCHNAPP AND YECHIEL SHALITIN. Immobilization of Enzymes by Covalent Binding to Amine Supports via Cyanogen Bromide Activation 8

L. LEVENBOOK, S. SRIDHARA, AND A. LAMBERTSSON. Extracellular Ribosomes during Metamorphosis of the Blowfly *Calliphora vicina* R. D. — A Reappraisal of Their Authenticity 15

SANTIAGO GRISOLIA AND RUTH WALLACE. Insulin Degradation by Lysosomal Extracts from Rat Liver; Model for a Role of Lysosomes in Hormone Degradation 22

RAMAN K. ROY, JAMES D. POTTER, AND SATYAPRIYA SARKAR. Characterization of the Ca^{2+}-Regulatory Complex of Chick Embryonic Muscles: Polymorphism of Tropomyosin in Adult and Embryonic Fibers 28

STUART L. MARCUS, STEVEN W. SMITH, CHARLES I. JAROWSKI, AND MUKUND J. MODAK. Terminal Deoxyribonucleotidyl Transferase Activity in Acute Undifferentiated Leukemia 37

JAMES A. RILLEMA. Activation of Casein Synthesis by Prostaglandins plus Spermidine in Mammary Gland Explants of Mice 45

YOUNG C. LEE, L. L. HOUSTON, AND RICHARD H. HIMES. Inhibition of the Self-Assembly of Tubulin by Diethylpyrocarbonate and Photooxidation 50

W. J. PLEDGER, W. J. THOMPSON, AND S. J. STRADA. Serum Modification of Cyclic Nucleotide Phosphodiesterase Forms Independent of Protein Synthesis 58

ADALING OGILVIE. Altered Metabolism of ppGpp in Quinone-Treated *E. coli:* Possible Role of Aminoacyl-tRNA Synthetases 66

BERNARD L. TRUMPOWER. Evidence for a Protonmotive Q Cycle Mechanism of Electron Transfer through the Cytochrome b–c_1 Complex 73

W. BORS, E. LENGFELDER, M. SARAN, C. FUCHS, AND C. MICHEL. Reactions of Oxygen Radical Species with Methional: A Pulse Radiolysis Study 81

JOHN M. WALKER, KENNETH V. SHOOTER, GRAHAM H. GOODWIN, AND ERNEST W. JOHNS. The Isolation of Two Peptides from a Non-Histone Chromosomal Protein Showing Irregular Charge Distribution within the Molecule 88

MICHAEL J. WARBURTON AND COLIN H. WYNN. The Hyperactivity of Hamster Fibroblast Lysosomal Enzymes after Endocytosis of Sucrose 94

R. AVERDUNK. Early Changes of 'Leak Flux' and the Cation Content of Lymphocytes by Concanavalin A 101

MARIA SZEKELY, THERESE LOVINY, AND RICHARD C. FOREMAN. Initiation Complex Formation with Double Stranded RNA 110

T. W. YOUNG AND S. J. HUBBALL. R-Factor-Mediated Resistance to Tetracycline in *Escherichia coli* K12: An R-Factor with a Mutation to Temperature-Sensitive Tetracycline Resistance 117

T. SASAKI, M. YAMASAKI, B. MARUO, Y. YONEDA, K. YAMANE, A. TAKATSUKI, AND G. TAMURA. Hyperproductivity of Extracellular α-Amylase by a Tunicamycin Resistant Mutant of *Bacillus subtilis* 125

PETKO UZUNOV, MARGARET E. GNEGY, AURORA REVUELTA, AND ERMINIO COSTA. Regulation of the High K_m Cyclic Nucleotide Phosphodiesterase of Adrenal Medulla by the Endogenous Calcium-Dependent-Protein Activator 132

V. P. BHAVANANDAN AND E. A. DAVIDSON. Characteristics of a Mucin-Type Sialoglycopeptide Produced by B16 Mouse Melanoma Cells 139

ANDREI BOKHON'KO AND RONALD H. REEDER. The Subunit Structure of Mouse Satellite Chromatin 146

ABDALLA MOHAMED OSMAN, TOSHIO YAMANO, AND YOSHIMASA MORINO. Inactivation of Aspartate Aminotransferase during Transamination with Chloropyruvate. Evidence Against Modification of Cys_{390} in Cytosolic Isoenzyme 153

ALEXANDER J. MURPHY. Cross-Linking of the Sarcoplasmic Reticulum ATPase Protein 160

YVONNE GRIMM-JORGENSEN, S. E. PFEIFFER, AND J. F. McKELVY. Metabolism of Thyrotropin Releasing Factor in Two Clonal Cell Lines of Nervous System Origin 167

STEPHEN KELLER, INES MANDL, STEVEN BIRKEN, AND ROBERT CANFIELD. Amino-Terminal Sequence of a Large Non-Polar Peptide from Elastin 174

R. WHATLEY, S. K.-C. NG, J. ROGERS, W. C. McMURRAY, AND B. D. SANWAL. Developmental Changes in Gangliosides during Myogenesis of a Rat Myoblast Cell Line and Its Drug Resistant Variants 180

KUO-PING HUANG, J. C. ROBINSON, AND JANICE Y. CHOU. Phosphoprotein-Phosphatase Activity Associated with Human Placental Alkaline Phosphatase 186

G. J. KELLEY, G. ZIMMERMANN, AND E. LATZKO. Light Induced Activation of Fructose-1,6-Bisphosphatase in Isolated Intact Chloroplasts 193

ISABEL F. WILLIAMS, RICHARD HARWOOD, AND MICHAEL E. GRANT. Triple Helix Formation and Disulphide Bonding during the Biosynthesis of Glomerular Basement Membrane Collagen 200

STEVEN M. PAUL AND ANGELOS E. HALARIS. Rat Brain De-acetylating Activity: Stereospecific Inhibition by LSD and Serotonin-Related Compounds 207

KUANGYU CHEN, JOHN S. HELLER, AND E. S. CANELLAKIS. The Inhibition of the Induction of Ornithine Decarboxylase by Cations 212

PETER M. STEINERT AND MARISA I. GULLINO. Bovine Epidermal Keratin Filament Assembly *in Vitro* 221

MASATOMO MAEDA, HIROSHI KOBAYASHI, MASAMITSU FUTAI, AND YASUHIRO ANRAKU. Non-Covalently Bound Adenine Nucleotides in Adenosine Triphosphatase of *Escherichia coli* 228

EVES J. BREAUX AND MYRON L. BENDER. Direct Spectrophotometric Observation of an Acyl-Enzyme Intermediate in Elastase Catalysis 235

HIROSHI ISHIKAWA, TAKAHISA NAGAYAMA, CHIEKO KATO, AND MASUO TAKAHASHI. The Effects of Growth Hormone-Releasing Hormone (GH-RH) and Thyroxine on the Synthesis and Release of GH in a Clonal Strain of Rat Pituitary Tumor Cells 241

BINA OPPENHEIM AND SASHA ENGLARD. Inhibition by Collagen Chains of Lysyl Hydroxylase of Chick Embryo and of WI-38 Human Lung Fibroblasts 248

ARTHUR H. KIRSCHENBAUM AND MURRAY P. DEUTSCHER. Amino Acid Acceptor Activity of tRNA-C-C-C-A 258

M. TAMURA, K. KOBAYASHI, AND K. HAYASHI. The No-Probed Detection of the Heme-Linked Ionization Group of Myoglobin 265

M. G. GABRIDGE, S. E. SINGER, AND R. A. ESPOSITO. Gradient, Polyacrylamide Gel Electrophoresis of Proteins from Cytotoxic Mycoplasma Membranes 271

WU-NAN KUO, MAMORU SHOJI, AND J. F. KUO. Isolation of Stimulatory Modulator from Rat Brain and Its Specific Effect on Guanosine 3':5'-Monophosphate-Dependent Protein Kinase from Cerebellum and Other Tissues 280

GEORGE M. RODGERS, JAMES W. FISHER, AND WILLIAM J. GEORGE. Elevated Cyclic GMP Concentrations in Rabbit Bone Marrow Culture and Mouse Spleen Following Erythropoietic Stimulation.. 287

SUSAN RITTENHOUSE-SIMMONS, FRANCIS A. RUSSELL, AND DANIEL DEYKIN. Transfer of Arachidonic Acid to Human Platelet Plasmalogen in Response to Thrombin 295

P. K. MUKHERJEE AND R. K. MANDAL. Role of S Gene of Bacteriophage lambda in Host Lysis 302

TETSUYA MATSUNO, NOBUYUKI SHIRASAWA, AND SEIYA KOHNO. Interferon Suppresses Glutamine Synthetase Induction in Chick Embryonic Neural Retina 310

MARK A. McINTOSH AND CHARLES F. EARHART. Effect of Iron on the Relative Abundance of Two Large Polypeptides of the *Escherichia coli* Outer Membrane 315

Volume 70, Number 2, May 17, 1976

AUTHOR INDEX, Volume 70, Number 2, May 17, 1976 ii

J. ZALITIS. Modification of Native Sheep Liver Fructose-1,6-Bisphosphatase by Subtilisin 323

H. ALLEN O. HILL, JOHAN C. LEER, BRIAN E. SMITH, CARLYLE B. STORM, and RICHARD P. AMBLER. A Possible Approach to the Investigation of the Structures of Cooper Proteins: ^{1}H N.M.R. Spectra of Azurin 331

M. J. BARNES, L. F. MORTON, and C. I. LEVENE. Synthesis of Collagens Types I and III by Pig Medial Smooth Muscle Cells in Culture 339

C. Y. LEE, A. S. K. LEE, SHIRLEY WONG, and LIN MA. Effects of Human Chorionic Gonadotropin and N^6-$O^{2'}$-Dibutyryl Adenosine-3', 5'-Monophosphate on Phosphofructokinase Activity in Isolated Rat Ovaries 348

AUTHOR INDEX, Volume 70 1330

Information for Contributors

BIOCHEMICAL AND BIOPHYSICAL RESEARCH COMMUNICATIONS is devoted to the rapid dissemination of timely and significant observations in the diverse fields of modern experimental biology. Manuscripts submitted should be so written as to clearly emphasize the novel aspects of the information reported, with the understanding that the same material has not been, nor will be, submitted for publication elsewhere.

Manuscripts in duplicate may be sent to any one of the editors whose names and addresses are listed on the inside front cover.

To ensure rapid and accurate publication, it is essential that manuscripts conform to the instructions which follow. Manuscripts which are not in accordance with these specifications may be returned.

Preparation of Manuscripts

Article length should not exceed 5 typewritten pages, double-spaced on 8.5 X 11 in. high quality paper (the complete manuscript, including space occupied by figures and tables, should not exceed 8 pages).

Summary. Each article must be preceded by a brief summary, typed single-spaced, not exceeding 10 lines (approximately 100-150 words). This paragraph should adequately summarize the pertinent findings of the paper.

Typing. Articles are reproduced directly from the submitted manuscript as camera-ready copy. Manuscripts must therefore be typewritten on good quality white bond paper. A black silk or carbon typewriter ribbon should be used. Special care should be taken to ensure a sharp clean impression of letters throughout. Use of an electric typewriter is strongly recommended. Erasures should be avoided. Care must also be taken to avoid errors in spelling, word division and punctuation. **No changes may be made in manuscripts after acceptance.**

Manuscripts should be double-spaced on one side of the sheet; **methods, references, footnotes and figure legends should be single-spaced.** Typing area of the page must be as close as possible to 6.5 in. wide and 9.5 in. long.

Symbols and Abbreviations defined in the IUPAC-IUB Document No. 1 *(Arch. Biochem. Biophys.* (1966) **115**, 1-12) may be used without definition. Use of all other abbreviations and symbols is to be avoided. When abbreviations are essential, they should be consistent with the form and style of the above document and **must be defined in a footnote**, rather then in the text. Such abbreviations **must not** be used in the Summary.

Enzyme names should not be abbreviated except when the substrate has an approved abbreviation (e.g., ATPase). Use the Enzyme Commission ("EC") code number when available.

Isotopes should be styled following the recommendations of the IUB Commission of Editors of Biochemical Journals. The symbol of the isotope introduced should be placed in square brackets directly attached to the front of the name (e.g., [^{32}P]CMP). Note that the isotope number should only be used as a (superior) prefix to the atomic symbol, not to an abbreviation.

For further information regarding nomenclature authors are advised to consult the Instructions to Authors of the **Archives of Biochemistry and Biophysics** (1974) **160**, iii-xii. Reprints are available from the Publisher.

Footnotes should be typed single-spaced at the foot of the page on which they are mentioned in the text. References and figure legends should be typed single-spaced on separate pages.

Illustrations and Tables. **Do not attempt to insert figures, figure legends or tables into the text.** This will be done by the Publisher.

All drawings should be clearly labeled in black ink in a manner suitable for direct reproduction (Leroy lettering size 120 or 140). Do not use press-on lettering; typewritten lettering is not acceptable.

Figures will be reduced to fit within the type area of the page (approximately 5 X 8 in.); the original drawings should be no larger than 8.5 X 11 in.

Glossy photographs of drawings are acceptable provided they are sharp, clear prints with an even *black* density.

Mathematical or chemical symbols that cannot be typed should be inked in carefully in black. Structural formulas should be drawn in black ink.

Illustrations and tables should be submitted on separate sheets.

Page Numbers and Headings. Page numbers should be typed at the top of the page.

The title of the paper should be typed in capital letters near the top of the first page, with the name(s) and affiliation(s) of the author(s) typed just below. Headings within the article should be arranged according to their relative importance.

References to the literature should be cited by the number in parentheses in the text and listed in numerical order in a single-spaced typed list placed at the end of the manuscript. Abbreviations of journals should conform to those of *Chemical Abstracts Service Source Index, 1969.* Note the following examples.

For a journal article:

1. Chattoraj, D. K., and Bull, H. B. (1971) Arch. Biochem. Biophys, 142, 363-370.

For a book by one or more authors:

2. Robinson, G. A., Sutherland, E. W., and Butcher, E. (1971) Cyclic AMP, pp. 298-302, Academic Press, New York.

Note that inclusive pagination must be given.

Acknowledgment of Receipt. Authors desiring acknowledgment of receipt of manuscript should enclose a stamped self-addressed card.

Reprints. Reprint order forms, with price lists, are sent to the authors immediately upon acceptance of their manuscript.
